

212°

the extra degree

At 211 degrees, water is hot.

At 212 degrees, it boils.

And with boiling water, comes steam.

And with steam, you can power a train.

One extra degree makes all the difference.

Subject: 212 Degree Actions

Just wanted to recognize a few folks who demonstrated that 212° spirit and stayed on board or came back early from our evacuation this morning. I am sure there were others and I'm sorry I didn't get your names so hats off to those whose name didn't get mentioned.

Business office personnel who stayed the whole time, handled traffic, taxi service and questions – Michelle Cox, Garnet Goodwin, Lynda Burns, Courtney Bakken

Security and M&O: Richard Treece, Chris Laubenstein, Dan Burns, Nathan (don't know last name)

Student Services: Greg Brown and Kathy Verseman who stuck it out the whole time. Julie Kozlowski, Shannon Davis, and Janie Ramsdorf who came back early and got things running again.

Library staff who came back and reopened the library shortly after 1:00 pm for the students still on campus: Dena Gast, Heather Hodges, Cathy Inscore, and Carolyn Hopkins.

Also a big thanks to those who helped with moving the Thai Group from campus to the Community Center those 212 Degree folks included Lisa Hinton, Tiffany Poma, Laura Hall, and Bruce Campbell.

Subject: 212° Action Report

A video conference was scheduled for a number of faculty and staff members today at 1:00 p.m. Chris Plummer got the Polycom equipment set up and checked out early in the day for the conference and all was a go. However.... When the conference was scheduled to begin there was a gremlin in the equipment and the connection failed. Chris was off campus for a dental appointment when the conference began. He somehow managed to shake lose from the appointment and rushed back to campus to get the equipment up and running.

Truly a 212° action! Thanks Chris for going above and beyond. ☺

I think it's appropriate that we recognize Chris Plummer for his efforts in putting together a CMC Softball Team that represented the college very well in the eyes of the community. A lot of time and effort went into practice and games that put CMC not just in the eyes of those at the games but in the newspaper as well. Thanks Chris for all your work!

Now that I have give some thought to this it's probably appropriate that we give some 212° recognition to the whole team!

Subject: 212 Degrees of Team Effort

Yesterday we had high school counselors, principals and other representatives from nearly all of the high school programs in our community, both public and private. We had great attendance for this event and a lot of positive feedback. The most important piece of feedback was regarding the people who work here and how committed they are to helping students succeed. That was a great message to provide these key communicators in our high schools. This program came together through the hard work of the following people:

Janie Ramstorf
Andrea Armstrong
Gregg Chesterman
Annette Bell
Kathy Verseman
Jackie Hanselman
Diana Morris
Sheri Holbrook
Elizabeth Tucker
Pam Hoyt
David Shook
Danuel Fox
Tamarsha Wells
Aaron Thiel
Julie Kozlowski
Carmen Diamond
Lynda Burns
Jim Arneson
Tiffany Poma
Robert Buscher
Kristal Sone
Raquel Schoenfeld
Theresa Roberts
Cheryl Munsey
Bruce's Coyote Kitchen

As you can see, this was a real team event and the crew spent approximately two months putting things together.

In addition, Khristy Warch was primarily responsible for organizing and recruiting employers for the Career Fair on campus today, too. I understand there were 41 organizations represented. Huge kudos also need to go to our M&O staff who set up and cleaned up both events. These folks set up tables and tents and we stomped all over Nathan's grass down here in Phase III, so we'll have to talk to it nicely during the next week or so.

Thanks to you all for representing CMC in such a great 212 degree fashion!

I'd like to add that our visitors during the flex days could not say enough about how impressed they were with our campus and how beautiful it is. Cudos to all who keep us looking great.

Thanks goes to Roger Wagner and Rodger McGinness for moving the Flex Activities schedule in the Nursing Lab.

The floor was in need of being cleaned and waxed; which is at least a two – three day project.

The 212° goes to effort of Cecelia Simpson and Dan Burns, who stripped, waxed, burnished the floor during the two days of Flex and Cece came in early this morning at 5:00 am to finish the floor; then Chris Laubenstein, Tony Alkas, Dan Burns, Nate LaFrancesca came in at 6:00 am this morning to get the Furniture back in place and the rooms set back up for the 7:00 am classes.

The floor looks AWESOME; almost looks like someone put a new floor in there.

Another 212° M&O Team effort...

Thanks

Subject: 212° Report

Speaking of 212° reports, I would like to compliment Mr. Roger Wagner for his extra effort on Friday evening. He was getting ready to leave campus for the weekend and noticed that there was a piece of gum on the sidewalk. He was concerned about someone stepping in it, and asked for a Kleenex to take care of it. I offered to remove it; however, he wouldn't allow me to do it, he wanted to take care of it himself. I know I have observed Mr Wagner's keen eye for detail and keeping things picked up about the campus in the past. Thank you Mr. Wagner, for your 212° effort! CMC is a better place as a result of your contributions.

Subject: 212 degrees for.....

Please join me in recognizing Student Success Center tutor, **Anthony Mack**, for his 212 degree effort. He is probably EXPERIENCING 212 degrees in the real sense since he has been called up by the National Guard to help with the dire fire situation in southern California. We miss him in the SSC and await his safe return.

Thank him for serving students, state and country when he returns,
Cheryl Munsey

A big 212 Degrees "thank you" to the members of the Research Committee for their hard work and dedication to completing the work on the mini-climate survey necessary for our current accreditation report. The members came in on Monday mornings at 7:00 for regular meetings, and then spent lots of personal time outside of meetings compiling and analyzing the data. Their work is very much appreciated!

Pat Caldwell, Ph.D., Superintendent/President

Subject: 212° Contribution - and Really Yummy Too

Over the last two weeks, the Debbie Elmore and Debra Pfeiffer in the Office of Instruction have provided home baked cookies and other delectable goodies for us. They each spent their own personal time baking. I have really enjoyed this extra effort that embraces the spirit of giving.

This 212° effort has been a special treat as we wrap up the semester and head into the holiday break.

THANK YOU THANK YOU THANK YOU THANK YOU

By the way, there are still plenty of goodies in the office of instruction.

Subject: 212 Degrees!

What a better way than to start the break with a 212 Degree recognition? As most of you are aware, the Transfer Empowerment Program is CMC's Federally Funded Grant Program. We are here to serve 160 students (minimum) through their educational and personal growth here at CMC, as well as preparing them for transfer to a four-year university.

As with any grant program, we are required to report and measure our success annually for every student ever served since the existence of the grant. CMC's annual report is due December 31st. However, our goal was to have it submitted prior to the break because not only will no one be here the 31st, we did not want to have this report hanging over our head going into the break.

I am estatic to announce that TEP submitted their report this morning, and our measurements exceed 100% of our objectives. Therefore, I would like to give a 212 Degree recognition to: **Daneul Fox (TEP's Program Assistant), Elida Santana (TEP's Student Worker) and Sheryl Cramm (TEP's Student Worker)**, for their dedication, determination, and many, many, hours of hard work ensuring this report was accurate and submitted in a timely manner. It has been a "stressful" couple of weeks, but this success has been worth every bit of it. Thank You to all three for your hard work, and support of TEP and all students at Copper Mountain College.
