

COPPER MOUNTAIN COLLEGE
2021-2022
CALIFORNIA STATE UNIVERSITY (CSU)

M	IP	N	Completion and certification of CSU will permit a student to transfer from Copper Mountain College to a campus in CSU system without the need, after transfer, to take additional lower-division general education courses. All courses must be completed with a grade of "C" or better. CERTIFICATION: GE Certification means that CMC has verified that a student has completed lower-division requirements for the CSU system. Certification is important, without certification students will be held to general education requirements specific to the CSU campus to which they transfer. GE certification is not required for transfer. Some high unit majors, for example engineering, may recommend prioritizing major preparation classes over GE certification. See a Counselor for more information. LEGEND: <i>Courses without prerequisites are italicized</i> *Courses that appear in multiple areas below, can only be counted in one area. +Transfer credit may be limited by UC, CSU or both. Consult with a counselor. M = Met/Completed IP = In Progress N = Need to Complete

COMPUTER SCIENCE

There is strong demand for Computer Science majors in the work force. It is estimated that there will be 20 openings for every Computer Science graduate in the US next year. The main reason for the rapid growth is a large increase in the demand for computer software. These entry level job opportunities have excellent salary and benefits with no job experience required.

CMC offers up-to-date training with transfer degrees and certificates that will prepare you for a four-year school or the job market.

Program Student Learning Outcomes

Upon successful completion of this program students will be able to:

1. Produce computer applications using structured programming techniques and object oriented design. (Institutional SLOs: Critical Thinking and Information Competency)
2. Critically apply, analyze, and evaluate fundamental concepts of software applications and hardware development. (Institutional SLOs: Critical Thinking and Information Competency)
3. Articulate the historical evolution of computer systems, including the legal, moral, and ethical issues associated with computers. (Institutional SLOs: Critical Thinking and Ethics)
4. Design and create solutions to a real world situation using the appropriate software. (Institutional SLOs: Information Competency)

ASSOCIATE IN SCIENCE IN COMPUTER SCIENCE for transfer

The Associate in Science in Computer Science for Transfer degree is designed for students pursuing degrees in Computer Science or Computer Engineering. Successful completion of the transfer degree in Computer Science guarantees the student acceptance to a local California State University to pursue a baccalaureate degree in Computer Science or a related field.

This degree includes the following completion requirements:

- (1) Completion of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following:

(A) The Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

(B) A minimum of 18 semester units or 27 quarter units in a major or area of emphasis, as determined by the community college district.

- (2) Obtainment of a minimum grade point average of 2.0.

Program Student Learning Outcomes

Upon successful completion of this program students will be able to:

1. Understand the ethical, mathematical, and physical concepts that underlie computer science.
2. Understand the different levels of abstraction that comprise Computer Science.
3. Create efficient, working computer programs that use fundamental programming constructs to solve real-life problems.
